Listing of Claims:

- 1. (Previously Presented) A magnetic disk for a hard disk drive, comprising:
- a substrate;
- a S1 magnetic layer located over said substrate;
- a layer of spacer material located over said S1 magnetic layer;
- a top magnetic layer that is located over said layer of spacer material and which contains a plurality of grains;
- a layer of chromium located adjacent to said top magnetic layer, a portion of said chromium being located between said grains of said top magnetic layer.
- 2. (Previously Presented) The disk of claim 1, further comprising a S2 magnetic layer located adjacent to said layer of chromium and said layer of spacer material.
- 3. (Original) The disk of claim 1, further comprising an underlayer located between said substrate and said S1 magnetic layer.
- 4. (Original) The disk of claim 1, further comprising an overcoat layer located over said top magnetic layer.
- 5. (Previously Presented) The disk of claim 4, wherein said layer of spacer material includes ruthenium.
 - 6. (Previously Presented) A hard disk drive, comprising:
 - a base plate;
 - a spindle motor coupled to said base plate;
 - a disk coupled to said spindle motor, said disk including;
 - a substrate:
 - a S1 magnetic layer located over said substrate;
 - a layer of spacer material located over said S1 magnetic layer;
- a top magnetic layer that is_located over said layer of spacer material and which contains a plurality of grains;
- a layer of chromium located adjacent to said top magnetic layer, a portion of said chromium being located between grains of said top magnetic layer;

an actuator arm mounted to said base plate;

- a voice coil motor coupled to said actuator arm;
- a flexure arm coupled to said actuator arm; and,
- a head coupled to said flexure arm and said disk.
- 7. (Previously Presented) The hard disk drive of claim 6, further comprising a S2 magnetic layer located adjacent to said layer of chromium and said layer of spacer material.
- 8. (Original) The hard disk drive of claim 6, further comprising an underlayer located between said substrate and said S1 magnetic layer.
- 9. (Original) The hard disk drive of claim 6, further comprising an overcoat layer located over said top magnetic layer.
- 10. (Previously Presented) The hard disk drive of claim 9, wherein said layer of spacer material includes ruthenium.

11-15. (Cancelled)
